We all have seen the makeup tutorial videos and step by step instruction guides that are supposed to teach us how to give our skin a radiant *glow* with one of the world's most obsessed beauty products, highlighter. Highlighter is a product that is to be put on the nose, center of forehead, and right on top of the cheekbones. While many professional makeup artists can just simply put the product on their face and automatically have that perfect shine, many makeup lovers are struggling to figure out what technique they did. Turns out, it may not be as much of a technique as what they are buying that is incorrect. Today you will learn about what products to use and combine to enhance your inner radiance.

Radiance Drops - Rainforest of the Sea™ Collection

This moisturizer is an incredible way to naturally have that light, dewy look for 32 dollars. To use it is simple: Shake the bottle to spread the tiny, pearl-like minerals throughout the bottle so you get the proper amount of oil and minerals. After shaking the bottle, simply get some of the product inside of the dispenser and unscrew the cap. It is smart to give around 3 to 4 drops to the entire face. To get even more of a bright and refreshed face, simply follow these steps but apply your daily makeup on top of it. It enhances the quality of highlighters and can be purchased from many makeup sites such as [Sephora](#).

INVISIBLE GLOW POWDER HIGHLIGHTER

This product works so well and is made in different tones to match every skin color. There are 4 total colors and each highlighter retails for 28 dollars and tax depending on location. Simply swipe your highlighting brush into the powder and apply as you would for any other highlighter. This product leaves the perfect shine without looking cakey or glittery. It is one of the most pigmented highlighters that I have ever tried and it lasts for months and months! It can be purchased from many makeup retailers or directly from the [Bare](#)

[Minerals website](#). On their website, there was an overall rating of 4.2 stars out of 5 which makes this product highly desirable.

184 Duo Fibre Fan Brush

[Mac's](#) 25 dollar highlighting brush is amazing and works like magic. Swipe the brush on your highlighter and apply. You may want to rub the brush on and around the spots you applied the product to just to blend the minerals of your highlighter into your skin for the perfect, instagram [#nofilter](#) worthy look.

@Beaverl ★★★★★

“So soft and light, does a great job at highlighting and taking off extra powder etc. I have some really creamy and intense shimmery highlighters/blushes and it'd be too much with regular brushes, this goes

like a dream with them. It also helps to swipe off or fix any excessive powder after makeup to lessen the cakey look.”

When the prices of these high rated beauty products total, it comes to 85 dollars. All of these items combined will make a perfect, polished, glow. Once you do your highlighter with these makeup bag must-haves, we can guarantee that it will look much nicer than it ever has before!
